Brgy 1. Pio Duran, Albay

SKILLS

- Programming: Python, Java, PHP, JavaScript
- Web Development: Django, Flask, FastAPI, HTML, CSS, Bootstrap, Tailwind
- Databases & Systems: MySQL, System Design, Inventory & Attendance Systems
- IoT & Integration: ESP8266/ESP32, Biometric System Integration (HFSecurity)
- Tools: Git, GitHub, VS Code, Postman, Google Workspace
- Core Skills: OOP, REST APIs, Software Development, Automation, Problem Solving, Database Management

PROFESSIONAL PROFILE

Software Developer and Computer Science graduate with hands-on experience in full-stack development, backend systems, and IoT solutions. Proficient in Python (Django, Flask, FastAPI), PHP, and JavaScript, with a strong focus on building scalable web applications, automation tools, and real-world integrated systems. Experienced in developing end-to-end projects from design to deployment, including IoT-based solutions and API-driven architectures. Passionate about automation, system optimization, and building practical technology solutions that improve efficiency and solve real operational problems. Actively seeking roles in software development, automation, and technical virtual assistance.

WORK EXPERIENCE

IT Programmer / Software Devleoper
MR Circuits and Security Inc.

- Developed and maintained internal software systems including an Inventory Management System and a Centralized Attendance System for organizational use
- Integrated HFSecurity biometric system for automated attendance tracking and secure user authentication
- Improved operational efficiency by digitizing manual processes, reducing recording and tracking workload by 35%

IT Instructor (Full-Time)
Southern Luzon Technological College Foundation Pio Duran Inc.

- Delivered lectures in Java, Python, OOP, Web Development, AI, and Software Engineering to 100+ students across multiple year levels
- Designed hands-on coding exercises and interactive lesson plans, improving student engagement and output quality by 40%
- Mentored students in real-world software development projects, with 90% successfully deploying working prototypes
- Guided students in career development and industry readiness, helping at least 15 students secure IT internships
- Continuously updated curriculum content to align with current industry technologies and standards

EDUCATION

Bachelor of Science in Computer Science
Southern Luzon Technological College Foundation Pio Duran Inc.
June 2019 – June 2023

Focus: Software Development, Object-Oriented Programming, Web Systems, Database Design

Technical Certification – Programming (Java NC III)
NRG-Info Tech (TESDA Accredited Training)
June 2024 – August 2024
Trained in Java programming, OOP principles, and application development fundamentals

CERTIFICATIONS & TRAINING

- IBM Software Engineer (with Honors) – IBM, February 2025
- Programming NC III (Java) – NRG-Info Tech, August 2024
- Contact Center Services NC II – SL-Pioduran Training Center, June 2024
- Leadership Awardee – Southern Luzon Technological College Foundation Inc., June 2023
- Enterprise Training Program – HR Primo Management, August 2024
- Certificate of Membership – PSITE Bicol Chapter, March 2024

PROJECTS

Inventory Management System
- Developed a web-based inventory system using Django and MySQL
- Implemented authentication, product management, and sales tracking
- Created responsive frontend using Bootstrap
- Integrated REST API for mobile support

Weather Mobile Application
- Created a weather forecasting mobile app using React Native and Expo
- Integrated location services and weather APIs
- Designed animated and responsive user interface

Online Registration System for Municipality of Pioduran
- Developed a web-based online registration system for the Municipality of Pioduran
- Built secure user authentication and registration management features using Django
- Implemented responsive frontend interface for residents and administrators
- Managed database integration for efficient record storage and retrieval
- Improved accessibility and streamlined municipal registration processes

Local Job Portal System

- Designed and developed a local job portal platform connecting employers and job seekers
- Implemented job posting, applicant management, and user profile features
- Developed backend functionalities using Django and REST APIs
- Created responsive and user-friendly interface for mobile and desktop users
- Enhanced recruitment efficiency through organized application tracking

AI-Powered Application Projects

- Developed AI-integrated applications focused on automation and smart data processing
- Implemented AI functionalities for prediction, classification, and intelligent recommendations
- Integrated APIs and machine learning features into web and mobile applications
- Worked with Python-based AI tools and frameworks for real-world solutions
- Focused on improving efficiency, user experience, and system automation

Centralized Attendance Management System with HFSecurity

- Developed a centralized attendance management system integrated with HFSecurity biometric devices
- Implemented real-time attendance monitoring and employee time tracking
- Built backend system using Django for attendance record management and reporting
- Integrated biometric authentication and automated attendance synchronization
- Improved accuracy, efficiency, and centralized management of attendance data
